

NFS[®]
FLUID TECHNOLOGY
STEAM AND THERMAL ENERGY
SMART ENERGY SAVING SYSTEM

STEAM SYSTEM
Meet various energy modes
Safe and reliable

COMPANY PROFILE

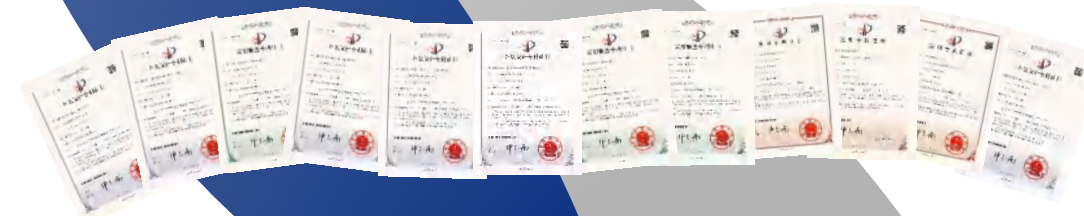

NFS is the professional manufacturer of industrial valves and steam traps, located in Wenzhou, China, integrating valve casting, complete machine research and development, production and sales. It was established in 1998, which has 26 years experience in the field, whose headquarter covers 75000 square meters and realizes digital intelligence integration.

VMV's products have been applied to steam system, thermal oil system, hot and cold water system, petroleum industry, natural gas industry, chemical industry, fertilizer industry, pharmacy industry, power industry etc.

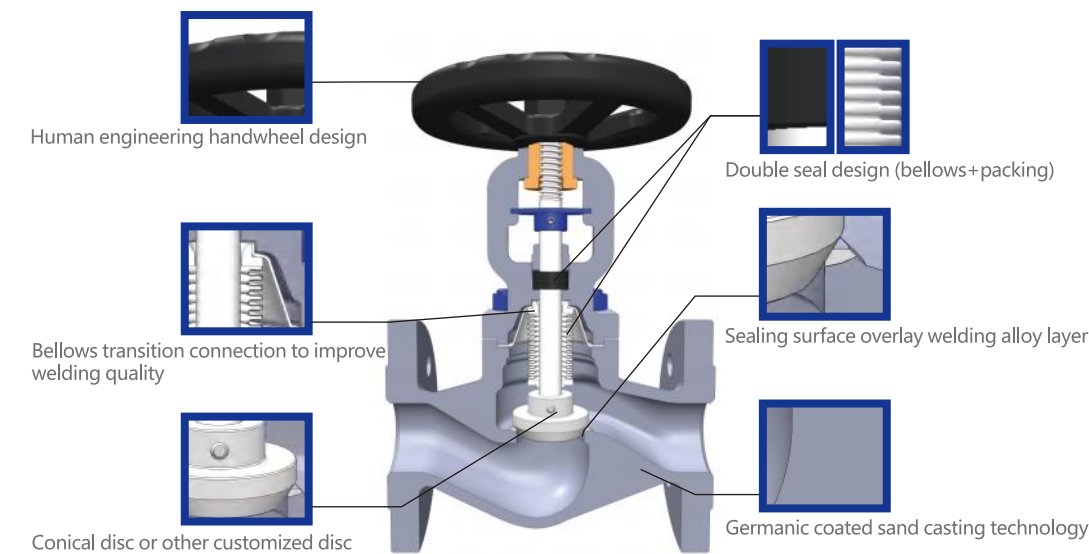

We have also qualified with CE, ISO, TS, API, EAC certificates etc.

CERTIFICATES

BELLOWS VALVE SERIES

The guide bracket device is installed when valve size exceeding DN150(NFS has patent), which can effectively reduce vibration and noise. Foremost, it can enhance the effective life of more than 150%.

STEAM TRAP SERIES

CONTROL VALVE

- 1.High adjustment accuracy and fast response speed.
- 2.Long service life and high sealing performance.
- 3.Stable adjustment even in the case of high differential pressure.
- 4.The upper pressure structure of the inner part makes on-site maintenance convenient and fast.
- 5.Application: Thermal oil system, high temperature steam control, cavitation, flash, high noise and other harsh conditions.

ENGINEERING CASES

NFS products have been widely used in industrial pipelines such as petroleum, chemical industry,metallurgy,electric power,military industry,paper making, pharmacy and engineering support.
